

	<u>PART 1</u>	<u>PART 2</u>	<u>PART 3</u>	<u>PART 4</u>
	this is the easy part... just follow the directions and format	Lucidly describe the setting each time. No place is exactly the same every day. Describe the sights, sounds, smells, ambience. You would be surprised how often you will construct a new perspective on an event that occurred during field research long after, while analyzing the data.	Part 3 is the place for detailed description. Describe interactions as objectively as possible in detailed description --- this is a vital facet of your research as it comprises the data that will lead to your conclusions.	Part 4 is the place for thinking about the data reported in Part 3 and reflecting on the consistency of the patterns and trends. Part 4 should be fully comprehensible without having to read Part 3 so you will need to recapitulate specific instances you wish to highlight in your discussion

NB #1	Complete in correct format	Describe in detail, anew each notebook	Lots of description; Collect good, detailed data	Brainstorm on topic; highlight questions, concerns; reference class material
NB #2	Complete in correct format; List the specific key words/descriptors used to find literature in the area of research	Describe in detail, anew each notebook	Lots of description; Collect good, detailed data	More brainstorming on topic; Reference class material; Begin to incorporate literature; find patterns/trends across notebooks
NB #3	Complete in correct format; List the specific key words/descriptors used to find literature in the area of research	Describe in detail, anew each notebook	Lots of description; Collect good, detailed data	Develop discussion; Incorporate data, class, and literature extensively; Analyze patterns/trends; Very preliminary conclusions
NB #4	Complete in correct format; State specific research hypothesis/research question	Describe in detail, anew each notebook	Lots of description; Collect good, detailed data	Develop discussion; Incorporate data, class, and literature extensively; Preliminary conclusions
NB #5	Complete in correct format; State specific research hypothesis/research question	Describe in detail, anew each notebook	Lots of description; Collect good, detailed data	Should come close to a rough draft of the Discussion section for the final paper with extensive use of data, class material, and literature
